Abstract: Among the flowering plants, the family Solanaceae is one of the economically important families in the world. Species in this family have been cultivated for vegetables (brinjal, potato, tomato etc.), spices (chili pepper), tobacco, garden flowers etc. At least 51 species of plants of this family were found to be infested by 60 species of aphids (Insecta: Homoptera: Aphididae) in India. Maximum number of aphid species (21 aphid species) are colonised on *Solanum tuberosum* followed by *Nicotiana tabacum* (18 aphid species), *Solanum melongena* (14 aphid species), *Solanum lycopersicum* (13 aphid species), *Datura metel* and *Solanum nigrum* (11 aphid species each), *Cestrum fasciculatum* (10 aphid species). Similarly, maximum number of plant species (34 plant species) are colonized by *Myzus (Nectarosiphon) persicae* (Sulzer) followed by *Aphis (Aphis) gossypii* Glover (30 plant species), *Aphis (Aphis) spiraecola* Patch (16 plant species), *Aphis (Aphis) fabae* Scopoli (14 plant species), *Brachycaudus (Brachycaudus) helichrysi* (Kaltenbach) (12 plant species), *Aphis (Aphis) craccivora* Koch (11 plant species), *Myzus (Myzus) ornatus* Laing (10 plant species), and less than 10 plant species in case of other aphid species.

Keywords: Aphids, Aphididae, Chilli, Pests, Potato, Solanaceae, Tomato.

INTRODUCTION

The aphid or plant lice (Insecta: Homoptera: Aphididae) are small sized (0.7- 7.0 mm in length) sap sucking insects and out of about 5,110 species described about 1,000 species are pestiferous to crops throughout the world (Singh *et al.*, 2019). Thelytokous parthenogenetic viviparity, short generation time (about 10 days on average), telescoping of generations, and polymorphism

are major traits of aphids that make them highly prolific in reproduction (Singh and Ghosh, 2002). Several species of aphids display complex life-cycles with alternation of sexual and asexual generations and host plant alternation (Ghosh and Singh, 2000; Singh and Singh, 2019; Singh and Singh, 2022). The aphids excrete honeydew, a characteristic sugary substance, which serves as food for several insects such as wasps,

butterflies, moths and ants (Singh *et al.*, 2000). Aphids also transmit viral diseases to several crops that necessitate crop management strategies against them. Although aphids are the pest of crops, they are extremely important hosts for a number of parasitoids, predators, and an essential meal for numerous other insects, as well as birds (Singh and Singh, 2021, 2022).

The family Solanaceae or nightshades is one of the dicotyledon plant families, comprising over 2,700 species with a worldwide distribution, except Antarctica. It has a great diversity of habitats, morphology and ecology and includes a number of economically important agricultural crops (e.g. brinjal, potato, tobacco, and tomato), medicinal plants (ashwagandha, blackberry nightshade), spices (bell peppers, chili peppers), weeds, and ornamentals (e.g. petunias). Several species of aphids infests brinjal, bell peppers, chili peppers, potato, tobacco and tomato and warrant for their control measure.

Probably, George (1927) was first to describe aphid fauna on Solanaceous plant in India followed by Krishnamurthi (1929), Despandey (1938) and Ghulam-Ullah (1940). Then, after independence, several workers particularly the team of Zoological Survey of India, Kolkata and others work hard in this field. Raychaudhury (1983) was first to catalogue the food plants of aphids of India. Later, Singh and Singh (2016a, b, 2017a-h, 2018; Singh *et al.*, 2018) updated the food plant checklists of all aphid species recorded in India.

MATERIAL AND METHODS

This checklist is based on the literature published in recent past books, journals and few authentic theses and websites up to 31 May, 2022. In the present compilation, attempts were made to provide the valid scientific name of the aphids and plants following update taxonomic information provided by <http://aphid.speciesfile.org> for aphids and <http://www.ars-grin.gov>, <https://www.gbif.org> and <http://www.theplantlist.org> for plants. At several places, their synonymies were also mentioned.

RESULTS AND DISCUSSION

The following checklist demonstrates that at least

51 species of plants of the family Solanaceae are infested by 60 aphid species in India. Maximum number of aphid species (21 aphid species) are found colonised on *Solanum tuberosum* followed by *Nicotiana tabacum* (18 aphid species), *Solanum melongena* (14 aphid species), *Solanum lycopersicum* (13 aphid species), *Datura metel* and *Solanum nigrum* (11 aphid species each), *Cestrum fasciculatum* (10 aphid species). Similarly, maximum number of plant species (34 plant species) are found colonised by *Myzus (Nectarosiphon) persicae* (Sulzer) followed by *Aphis (Aphis) gossypii* Glover (30 plant species), *Aphis (Aphis) spiraecola* Patch (16 plant species), *Aphis (Aphis) fabae* Scopoli (14 plant species), *Brachycaudus (Brachycaudus) helichrysi* (Kaltenbach) (12 plant species), *Aphis (Aphis) craccivora* Koch (11 plant species), *Myzus (Myzus) ornatus* Laing (10 plant species), and less than 10 plant species in case of other aphid species. Economic importance and food plant association of following aphid species that have been found to infest the plants belonging to Solanaceae family has earlier been dealt by several workers, e.g. *Aphis (Aphis) craccivora* Koch (Trivedi and Singh, 2014), *Aphis (Aphis) fabae* Scopoli (Singh *et al.*, 2015a), *Aphis (Aphis) gossypii* Glover (Singh *et al.*, 2014), *Aphis (Aphis) spiraecola* Patch (Singh and Singh, 2016b), *Brevicoryne brassicae* (Linn.) (Pal and Singh, 2012) and *Myzus (Nectarosiphon) persicae* (Sulzer) (Singh *et al.*, 2015b).

Following are the updated aphid wise as well as plant wise (subgeneric name of the aphids and author names are excluded) checklist of aphids infesting the plants belonging to the Solanaceae in India.

I. Aphid wise-plant wise checklist

A. Subfamily: Anoeciinae

1. *Anoecia (Anoecia) corni* (Fabricius, 1775)

- *Petunia integrifolia* (Hook) Schinz and Thell. (=*Petunia violacea* Lindl.) (Chakrabarti, 1972)

2. *Anoecia (Anoecia) himalayensis*

Chakrabarti and Maity, 1978

- *Petunia integrifolia* (Hook) Schinz and Thell. (=*Petunia violacea* Lindl.) (Chakrabarti and Maity, 1978)

B. Subfamily: Aphidinae**I. Tribe: Aphidini****1. *Aphis (Aphis) craccivora* Koch, 1854**

- *Cestrum nocturnum* L. (Rao, 1969; Singh and Singh, 2017a)
- *Cestrum* sp. (Raychaudhuri, 1973)
- *Lycopersicon* sp. (Agarwala, 1979)
- *Nicotiana tabacum* L. (Raychaudhuri, 1973; Singh et al., 2003)
- *Petunia alba* Hort. Ex Ferg. & Ottl. (Ghosh and Raychaudhuri, 1962a; Behura, 1965; Raychaudhuri, 1973)
- *Petunia integrifolia* (Hook) Schinz and Thell. (= *Petunia violacea* Lindl.) (Chakrabarti, 1972)
- *Solanum clavatum* Rusby (Raychaudhuri, 1973)
- *Solanum lycopersicum* L. (= *Lycoperiscon esculentum* Mill.) (Verma et al., 1975; Singh and Singh, 2017a; Ahmad and Kumar, 2006)
- *Solanum melongena* L. (Ghosh and Singh, 2004; Singh and Singh, 2017a; Bhat et al., 2020)
- *Solanum nigrum* L. (George, 1927; Behura, 1963; Ghosh and Singh, 2004; Singh and Singh, 2017a)
- *Solanum* sp. (Raychaudhuri, 1973)
- *Solanum tuberosum* L. (Behura, 1963; Verma et al., 1975; Ahmad and Kumar, 2006)
- *Solanum virginianum* L. (= *Solanum xanthocarpum* Schrad.) (= *Solanum surattense* Burm. f.) (Ahmad and Kumar, 2006)

2. *Aphis (Aphis) fabae* Scopoli, 1763

- *Capsicum annuum* L. (Raychaudhuri, 1978; Raha, 1979; Singh et al., 2003)
- *Capsicum frutescens* L. (Singh et al., 2015a)
- *Cestrum diurnum* L. (Singh et al., 1999)
- *Cestrum fasciculatum* (Schltdl.) Miers (Behura, 1963; Basu, 1969; Raychaudhuri, 1973)

- *Cestrum nocturnum* L. (Ghosh, 1990; Ahmad and Singh, 2005)
- *Cestrum* sp. (Agarwala, 1979; Raychaudhuri, 1973)
- *Datura metel* L. (= *Datura fastuosa* L.) (Raychaudhuri, 1973; Ahmad and Singh, 2005)
- *Datura stramonium* L. (Chakrabarti and Sarkar, 2001)
- *Nicotiana* sp. (Chakrabarti et al., 1971a)
- *Nicotiana tabacum* L. (Raychaudhuri, 1973; Singh et al., 2003)
- *Solanum clavatum* Rusby (Raychaudhuri, 1973)
- *Solanum melongena* L. (Raychaudhuri, 1978; Ghosh and Singh, 2004; Singh et al., 2015a)
- *Solanum nigrum* L. (Raychaudhuri, 1978; Agarwala, 1979; Ghosh and Singh, 2004)
- *Solanum torvum* Sw. (Raychaudhuri, 1973; Singh et al., 2003)
- *Solanum tuberosum* L. (Bhalla and Pawar, 1980; Kataria and Kumar, 2012)
- *Solanum* sp. (Raychaudhuri, 1978)

3. *Aphis (Aphis) glycines* Matsumura, 1917

- *Solanum lycopersicum* L. (Ahmad et al., 2020)

4. *Aphis (Aphis) gossypii* Glover, 1877

- *Capsicum annuum* L. (David, 1957; Raychaudhuri, 1973; Singh et al., 2014; Bhat et al., 2020)
- *Capsicum frutescens* L. (Krishnamurthi, 1929; Raychaudhuri, 1978; Agarwala, 1979; Ahmad et al., 2020)
- *Capsicum* sp. (Ghulam-Ullah, 1940; Rizvi and Paul Khurana, 1970)
- *Cestrum diurnum* L. (David, 1957; Behura, 1963)
- *Cestrum nocturnum* L. (David, 1957; Sengupta et al., 1962; Behura, 1963; Rao, 1969; Raychaudhuri, 1973; Singh et al., 2014)
- *Cestrum* sp. (Basu and Banerjee, 1958; Raychaudhuri et al., 1980)
- *Datura metel* L. (Agarwala, 1979; Raychaudhuri, 1973)

- *Datura* sp. (Behura, 1963; Rao, 1969; Ghosh, 1970)
 - *Datura stramonium* L. (Chakrabarti, 1972; Raychaudhuri, 1973)
 - *Nicotiana tabacum* L. (Behura, 1963; Agarwala, 1979; Raychaudhuri, 1973)
 - *Nicotiana* sp. (Chakrabarti, 1972; Agarwala and Raychaudhuri, 1979)
 - *Petunia* sp. (David, 1957; Behura, 1963; Raychaudhuri, 1973)
 - *Physalis peruviana* L. (Rao, 1969; Singh et al., 2003)
 - *Solanum aethiopicum* L. (=*Solanum gilo* Raddi.) (=*Solanum succagnianum* Dunal) (Behura and Roy, 1980)
 - *Solanum betaceum* Cav. (=*Cyphomandra betacea* (Cav.) Sendtn.) (Rao, 1969; Raychaudhuri, 1973; Agarwala, 1979; Agarwala and Raychaudhuri, 1981a)
 - *Solanum citrullifolium* A. Braun. (Behura and Roy, 1980)
 - *Solanum incanum* L. (Behura and Roy, 1980)
 - *Solanum integrifolium* Poir (Behura and Roy, 1980)
 - *Solanum lycopersicum* L. (Behura, 1963; Raychaudhuri, 1973; Ahmad et al., 2020)
 - *Solanum melongena* L. (Krishnamurthi, 1929;
 - Agarwala, 1979; Kataria and Kumar, 2012; Ahmad et al., 2020)
 - *Solanum nigrum* L. (Krishnamurthi, 1929; Raychaudhuri, 1978; Agarwala, 1979)
 - *Solanum quitoense* Lam. (Behura and Roy, 1980)
 - *Solanum scabrum* Mill. (=*Solanum melanocerasum* All. Auct.) (Behura and Roy, 1980)
 - *Solanum seaforthianum* Andrews (Behura, 1963; David, 1958a)
 - *Solanum sisymbriifolium* Lam. (Raychaudhuri, 1973)
 - *Solanum torvum* Sw. (Agarwala, 1979; Raychaudhuri, 1973)
 - *Solanum trilobatum* L. (Behura and Roy, 1980)
 - *Solanum tuberosum* L. (Basu and Banerjee, 1958; Sengupta et al., 1962; Bhat et al., 2020)
 - *Solanum violaceum* Ortega (Ghulam-Ullah, 1940; Behura, 1963)(Behura, 1965; Singh et al., 2003)
 - *Solanum virginianum* L. (Basu and Banerjee, 1958; Behura, 1963; Raychaudhuri, 1973)
 - *Solanum wendlandii* Hook. f. (Behura, 1963; David, 1958a)
 - *Solanum* sp. (George, 1927; Rao, 1969; Raychaudhuri, 1973; Agarwala, 1979)
 - *Withania somnifera* (L.) Dunal (Chaudhary, 2013)
- 5. *Aphis (Aphis) nasturtii* Kaltenbach, 1843**
- *Capsicum annuum* L. (Raychaudhuri, 1973; Rao and Kulkarni, 1977)
 - *Capsicum frutescens* L. (Raychaudhuri, 1973; Rao and Kulkarni, 1977; Ahmad and Singh, 2005; Ahmad et al., 2020).
 - *Cestrum* sp. (Chakrabarti et al., 1971a; Chakrabarti, 1972; Rao and Kulkarni, 1977)
 - *Datura stramonium* L. (Das and Chakrabarti, 1988)
 - *Solanum lycopersicum* L. (Rao and Kulkarni, 1977; Ahmad et al., 2020)
 - *Solanum melongena* L. (Rao and Kulkarni, 1977; Ahmad and Singh, 2005; Ahmad et al., 2020)
 - *Solanum nigrum* L. (Raychaudhuri et al., 1980)
 - *Solanum tuberosum* L. (Ahmad et al., 2020)
- 6. *Aphis (Aphis) nerii* Boyer de Fonscolombe, 1841**
- *Solanum melongena* L. (Singh et al., 1999; Ahmad and Singh, 2005)
 - *Solanum tuberosum* L. (Bhatnagar et al., 2017)
- 7. *Aphis (Aphis) odinae* (van der Goot, 1917)**
- *Datura metel* L. (Raychaudhuri, 1973; Mondal et al., 1976)
 - *Nicotiana tabacum* L. (Rao, 1969; Singh et al., 2003)

- *Solanum clavatum* Rusby (Raychaudhuri, 1973)

8. *Aphis (Aphis) rumicis* Linnaeus, 1758

- *Solanum nigrum* L. (Ghulam-Ullah, 1940)
